

### Sustainability Experience and Best Practices

Ecotourism is accepted as an approach that assures the sustainability of natural resources, supports economic development of host communities and contributes to the conservation of natural resources.

Ecotourism is a responsible travel, and guarantees the conservation of environment and the wellbeing of local people.

Mctours-Roatan Sustainability Project 2019-2020 are aiming to be beneficial for the natural, cultural, historical and geographical values of our destination by establishing a conservation-utilization balance; to develop tourism alternatives; to increase the share of our country in ecotourism; and to support our island and its locals.

Implementing sustainability aspects into our daily procedures , including all aspects of our operations and including businesses, that meet the criteria, aswell as putting good practices examples into service.

Mctours-Roatan aims to demonstrate

Effective Sustainable Management;

Maximize social and economic benefits to the local community and minimize negative impacts;

Maximize benefits to cultural heritage and minimize negative impacts;

Maximize benefits to the environment and minimize negative impacts.

Based on these criteria, our good practice samples will be mentioned below:

Consumption of local and organic products, prioritization of the local people in product purchase and recycling, waste management, measures and warnings to reduce waste, including disposable products. The development of various eco-tourism activities and the necessary information to protect the natural and cultural asset.
